for the way you cook

Introducing the Evo Flattop Grills

If you've wanted to gather your family and friends around the grill, but were put off by the smoke and flare-ups of open flame grilling, then allow us to introduce the Evo Flattop Grill. The Evo Flattop Grill offers a sensational way to cook and entertain outdoors that invites participation and conversation as much as it does creativity.

With a circular flattop cooking surface and variable temperature control from 120°C to 340°C, Evo offers you an outdoor kitchen to cook virtually any cuisine. Start with perfectly seared scallops, and move to rib-eye steaks with grilled vegetables, followed by a dessert of cherries jubilee over almond crepes. With Evo, the menu possibilities are endless.
